

We feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

We used to get over 25 unwanted calls and many of those calls after six pm. Its frustrating to hear the phone ringing while eating supper or watching TV. We got to the point where we don't even answer the phone .

Since I signed up for with the Indiana Telephone Privacy, I received an average or 2-4 calls a day. So much better than getting over 25 calls. It has been very effective and very helpful and our family is no longer frustrated with those annoying calls.

We ask that you leave Indiana Privacy Law ALONE!

Thank you for listening to our concerns.

Sincerely,

Cheryl Latkowski
